DETAILED ACTION***Response to Amendment A***

Applicants' arguments, filed 08 February 2002, have been fully considered but they are not deemed to be persuasive. Rejections and/or objections not reiterated from previous office actions are hereby withdrawn. The following rejections and/or objections are either reiterated or newly applied. They constitute the complete set presently being applied to the instant application.

The new claims 55-72 are acknowledged and withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected Group I, there being no allowable generic or linking claim. Group I is drawn to a method of molecular dynamic simulation that uses a simulated ion. Claims 55-72, as a computer readable medium that stores instructions for molecular dynamic simulation, are considered to correspond to the invention of Group 1. Election was made **without** traverse in Paper No. 7, filed: 17 May 2001.

Claim Rejections - 35 USC § 101

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 37-54, as necessitated by amendment, are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. Claim 37 claims the storage of a data structure on a computer readable medium. The storage of a data structure, a "simulated metal ion" (line 2) as instantly claimed, is merely the storage of a mere arrangement of data; thus non-statutory. See MPEP 2106:

(The definition of "data structure" is "a physical or logical relationship among data elements, designed to support specific data manipulation functions." The New IEEE Standard Dictionary of Electrical and Electronics Terms 308 (5th ed. 1993).) "Nonfunctional descriptive material" includes but is not limited to music, literary works and a compilation or mere arrangement of data. [...] Merely claiming nonfunctional descriptive material stored in a computer-readable medium does not make it statutory. Such a result would exalt form over substance. In re Sarkar, 588 F.2d 1330, 1333, 200 USPQ 132, 137 (CCPA 1978) ("[E]ach invention must be evaluated as claimed; yet semantogenic considerations preclude a determination based solely on words appearing in the claims. In the final analysis under 101, the claimed invention, as a whole, must be evaluated for what it is.") (quoted with approval in Abele, 684 F.2d at 907, 214 USPQ at 687). See also In re Johnson, 589 F.2d 1070, 1077, 200 USPQ 199,

Art Unit: 1631

206 (CCPA 1978) ("form of the claim is often an exercise in drafting"). Thus, nonstatutory music is not a computer component and it does not become statutory by merely recording it on a compact disk. Protection for this type of work is provided under the copyright law.

Thus claim 37 is directed to non-statutory subject matter. Claims 38-54 which depend from claim 37, are also directed to nonfunctional descriptive material.

The phrase "A computer readable medium having data structures store thereon, comprising a data structure **to store** a simulated metal ion" is interpreted as a data structure that already contains the data that is further limited by the dependent claims by the specific limitations the data stored is to have; and not a data structure *capable* of containing the listed possible descriptions of the data.

Conclusion

Please note that the interview summary does not reflect agreement as to any particular amendments to the claims. Potential amendments to the claims were discussed though no amendment was finalized and agreed upon.

No claim is allowed.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
